JIYA BHATI

SOFTWARE DEVELOPER

PROFILE

Dedicated and results-oriented Computer Science student with a strong foundation in programming and problem-solving. Seeking to leverage technical skills and academic knowledge in a challenging and innovative environment. Proficient in Python, C. Html and CSS.

Actively involved in campus clubs and organizations, where I have developed strong teamwork and leadership skills. Eager to contribute to dynamic projects and learn from experienced professionals.

ACADEMIC PROJECTS

Online Book Platform

A web-based platform for reading, sharing, and publishing books.

As a software developer, I:

- Designed and implemented the platform's architecture.
- Developed the user interface.
- Built core features like book search, publishing, and forums.
- Integrated with third-party services.
- Tested and debugged the platform.
- Maintained and updated the platform.

E-commerce Website

An online platform for users to browse, select, and purchase products.

- Develops front-end (UI/UX) and back-end (serverside logic, database).
- Integrates with payment gateways, shipping carriers.
- Tests, debugs, maintains, and updates the website.
- Ensures security, optimization, and positive user experience.

RESEARCH EXPERIENCE

AI-Powered Object Recognition and Guidance System for the Visually Impaired.

- An AI-powered device that assists visually impaired individuals in navigating their surroundings.
- The device utilizes a camera and advanced algorithms to detect and identify objects, providing real-time audio descriptions.
- Additional features include obstacle avoidance and navigation assistance.
- The goal is to enhance the quality of life for visually impaired individuals by empowering them with greater independence and mobility.
